Orthopedic Clinical Examination emphasizes evidence-based practice and therefore focuses on tests that are clinically relevant, providing students and clinicians with the most appropriate testing options rather than listing tests with no regard for their clinical value. Both treatment-based and pathological-based diagnostic styles are covered in detail so that readers will gain a thorough understanding of both approaches and be able to

implement them separately or in tandem.

Most orthopedic special tests involve a degree of subjectivity and few are sensitive or specific enough to have clinical value on their own. Even when these tests are clustered there are issues with testing validity, this is because these tests are often good at reproducing pain but not great at telling us what structures the symptoms are coming from (Docking et al., 2016 ; Hegedus et al ...
