1. Outpatient Oncology Acuity Based Staffing Model. Julie Larson RN, OCN. Background: Scheduling oncology patients for infusion therapy has been based on infusion chair time, physician's schedule, pharmacy capacity, and number of patients per RN. This has proven to be ineffective and inefficient. Scheduling strictly by chair time based on a set time for each specific drug or regime is inadequate to correctly predict the amount of time each nurse needs with each specific patient.

Our outpatient infusion room at Levine Cancer Institute is a 132 bay/bed unit. ... We used a study to focus a tool based on acuity and use that acuity to assign patients. I chose the tool because our institution gave us several ways to measure productivity. None are full reflective of all the work my nurses do!
