"Gail Gibbons is known for her ability to bring the nonfiction world into focus for young students. Through pictures, captions, and text, this book provides a window into the world of growing things...Erin Mallon complements Gibbons ' s text with a clear, clipped, and purposeful narration." -AudioFile Magazine

Creative ways to use the garden to inspire learning, for kids ages 4-8 Packed with garden-based activities that promote science, math, reading, writing, imaginative play, and arts and crafts, The Garden Classroom offers a whole year of outdoor play and learning ideas—however big or small your garden. Every garden offers children a rich, sensory playground, full of interesting things to discover and learn about. There's a whole lot of science happening right before their eyes. The garden can also be a place to develop math and literacy skills, as the outdoors offers up plenty of invitations to weave learning into everyday gardening. The garden classroom is a place where plants grow, and where children grow too.

Plantology guides young nature enthusiasts on a journey into the world of plants and the role they play in our lives. Full of colorful photos and illustrations, this fun and interactive resource presents clear, kid-friendly discussions of plant topics from the underground up—from seeds, roots, and sprouts to plant skeletons, leaves, petals, flowers, and fruits. But naturalist Michael Elsohn Ross goes beyond plant basics to explore the unknown world of common weeds, fascinating plant defense systems, the marvelous mechanisms of seed dispersal and pollination, and the history of everyday plant products in our homes. Plantology also illuminates humans' connections with plants and the solutions they offer, from low-cost sewage treatment and toxic waste removal to providing new medical cures. With encouragement to "Try This" and "Look For," kids participate in 30 hands-on activities that promote observation and analysis, writing and drawing, math and science, and nature literacy skills. They will keep a plant journal, examine and sketch plant shapes, colors, and structures; start a seed collection, make tasty plant dishes, and more. Readers from any region will start to take notice of the plants around them—not just in parks, gardens, and woods but also around the schools, buildings, and sidewalks of their town, and in their own backyards. Useful resources include a glossary of plant terms, a list of plant and nature organizations and groups, and a teacher's guide to initiate classroom discussion and investigation.

Just for kids: A guided nature journal to see, write, and sketch every discovery. Wild creatures, cloud formations, plant habitats, and more—nature is full of wonders to behold and explore! In this nature journal, young naturalists will get all of the guidance they need to study and record their experiences of the natural world. From developing observational skills to sketching and using all senses, Exploring Nature Journal for Kids encourages curious minds to think creatively and scientifically about the world around them. Complete with activity prompts and journaling ideas, this book is a must-have to make every outdoor adventure an opportunity for discovery. The Exploring Nature Journal for Kids includes: Nature Journal 101--Teach kids how to hone their powers of observation with essential guidance for taking field notes, using descriptive language, drawing, and reflecting on what they've seen! Handy Guidance--Get inspiration for outings, journaling ideas to spark writing, along with clues for what to look for and where. Space to Explore--Jot down thoughts, sketch, and engage your little naturalist's creativity. There is a world of discovery waiting outside—and this nature journal is the kids guide to experiencing it.

How does a tiny acorn grow into an enormous oak tree? This classic Level 1 Let's-Read-and-Find-Out picture book shows how little seeds become the plants and trees that surround us. This nonfiction picture book is an excellent choice to share during homeschooling, in particular for children ages 4 to 6. It ' s a fun way to learn to read and as a supplement for activity books for children. Now rebranded with a new cover look, this book includes a find out more activity section with a simple experiment encouraging kids to discover what a seed needs to grow. Both text and artwork were expert-reviewed for accuracy. This is a Level 1 Let's-Read-and-Find-Out, which means the book explores introductory concepts perfect for children in the primary grades and supports the Common Core Learning Standards and Next Generation Science Standards. Let's-Read-and-Find-Out is the winner of the American Association for the Advancement of Science/Subaru Science Books & Films Prize for Outstanding Science Series.

Maya loves contests, so she is excited when her teacher announces they will plant a school garden like Thomas Jefferson's garden at Monticello—and they ' ll have a "First Peas to the Table" contest, just like Jefferson and his neighbors had each spring. Maya plants her pea seeds with a secret head start—found in Jefferson ' s Garden Book—and keeps careful notes in her garden journal. But her friend Shakayla has plans of her own for the contest.

Explore the unique and expansive learning opportunities offered by gardening with children Gardens are where children ' s imaginations engage nature, and the result is joyful learning. Gardening helps children develop an appreciation for the natural world and build the foundation for environmental stewardship. This book is packed with information and inspiration to help you immerse children in gardening and outdoor learning experiences—green thumb or a perfect plot of land not required. Learn how a gardening curriculum supports learning and development across all domains. You ' ll also find heaps of suggestions for planning, planting, and caring for a garden suited to your unique setting, such as container gardens, raised beds, in-ground gardens, gardens grown vertically on a wall or fence, and even rooftop gardens. Cultivate children ' s wonder and appreciation for nature. This book provides More than 60 hands-on learning activities for children of all ages to explore plants and garden creatures Vibrant photographs and classroom stories describing showcasing great programs from around the country New content reflecting childhood issues and gardening trends that have surfaced in recent years, including concerns that children are becoming alienated from nature, and that childhood obesity is becoming an epidemic Resources to help your garden flourish, seed and garden supply lists, information on poisonous plants, and books about gardens and garden creatures
