when we challenge conventional definitions of war, we are left with a new problem, how to define ourselves. *Population Wars* is a paradigm-shifting book about why humans behave the way they do and the ancient history that explains that behavior. In reading it, you'll see why we need to rethink the reasons for war, not only the human military kind but also Darwin's "war of nature," and find hope for a less violent future for mankind.

In "Population Wars", Dr. Greg Graffin explores interactions among populations of all varieties, from the microscopic to the human, from the beginning of life on Earth to the present day. One of the book's central arguments is that it is equilibrium and symbiosis, not "survival of the fittest," that ultimately settles conflicts between species in nature.

Population Wars offers a fascinating perspective on the age-old idea of Survival of the Fittest. Graffin explains why coexistence—not competition—is what drives evolution, citing biological, economic, and environmental examples, from pipe-dwelling bacteria to Native American populations during the revolutionary war.

## **Population Wars: A New Perspective on Competition and ...**

At the bottom line the book holds up to its promising title: a new perspective on population wars and subsequently civilization(s). Graffin is a trained palaeontologist, zoologist and geologist, but most of all, he is a naturalist. The book details his view of ecology and its impact on both populations and the individual's day-to-day life.
