You have found the book to help you survive your whole high school and college years! Have you ever had a essay paper due and just had nothing...no ideas, nowhere to begin, nowhere to start...just staring at a blank screen or piece of paper? This book is here to help you find a topic to write on and even before that, show you the steps you need to take so you don't waste your time before you even begin starting your research and writing your paper. You will find the following categories with tons of topics in each: -Animal, Energy, and Environment -Business -Crime and Law -Drug and Drug Abuse -Education -Family and Children Issues -Government and Political Issues -Health -Media and Communications -Psychology -Religion -Science and Technology -Social Issues -Terrorism -Women and Gender -World Issues Don't worry if you don't see your specific category, because it could be a topic. Even if it isn't, these topics are great starting points to add another topic to one you currently have and/or are maybe struggling with. It could also give you ideas on where to take a topic if you already have one chosen. Usually combining two topics can lead to a more in-depth and focused research paper, but it really depends on what your assignment asks for. In addition there are over 30 questions to help focus your research, find your supporting points, and help to begin your paper and write your thesis. No topic and no supporting points equal no thesis, no research paper and the clock is tick tick ticking. There are also quick links within the e-book to help you navigate and jump around within the categories with ease and convenience, if you decide you want to change topics. This book will be a great addition to help any student who needs help finding a research topic and starting their paper!

Even students capable of writing excellent essays still find their first major political science research paper an intimidating experience. Crafting the right research question, finding good sources, properly summarizing them, operationalizing concepts and designing good tests for their hypotheses, presenting and analyzing quantitative as well as qualitative data are all tough-going without a great deal of guidance and encouragement. Writing a Research Paper in Political Science breaks down the research paper into its constituent parts and shows students what they need to do at each stage to successfully complete each component until the paper is finished. Practical summaries, recipes for success, worksheets, exercises, and a series of handy checklists make this a must-have supplement for any writing-intensive political science course. New to the Fourth Edition: A non-causal research paper woven throughout the text offers explicit advice to guide students through the research and writing process. Updated and more detailed discussions of plagiarism, paraphrases, "drop-ins," and "transcripts" help to prevent students from misusing sources in a constantly changing digital age. A more detailed discussion of "fake news" and disinformation shows students how to evaluate and choose high quality sources, as well as how to protect oneself from being fooled by bad sources. Additional guidance for writing abstracts and creating presentations helps students to understand the logic behind abstracts and prepares students for presentations in the classroom, at a conference, and beyond. A greater emphasis on the value of qualitative research provides students with additional instruction on how to do it.

Understanding and Evaluating Research: A Critical Guide aims to sensitize students to the necessity of learning how not to defer to the mysterious authority of the experts, but rather to learn how to be a critical consumer of others' research, and to gain confidence in their ability to be producers of research. Sue McGregor shows students how to be research literate, and how to find, critique and apply other people's scholarship. This textbook is grounded in a solid understanding of the prevailing research methodologies for creating new knowledge (philosophical underpinnings), which in turn dictate problem posing, theory selection, and research methods (tasks for sampling, collecting and analyzing data, and reporting results).

All researchers want to produce interesting and influential theories. A key step in all theory development is formulating innovative research questions that will result in interesting and significant research. Traditional textbooks on research methods tend to ignore, or gloss over, actual ways of constructing research questions. In this text, Alvesson and Sandberg develop a problematization methodology for identifying and challenging the assumptions underlying existing theories and for generating research questions that can lead to more interesting and influential theories, using examples from across the social sciences. Established methods of generating research questions in the social sciences tend to focus on 'gap-spotting', which means that existing literature remains largely unchallenged. The authors show the dangers of conventional approaches, providing detailed ideas for how one can work through such problems and formulate novel research questions that challenge existing theories and produce more imaginative empirical studies. Constructing Research Questions is essential reading for any researcher looking to formulate research questions that are interesting and novel.

The first edition of A Tutor's Guide helped tutors across the country connect composition theory to the everyday events in their tutoring sessions. This second edition moves further into the practical realities of today's writing centers, taking a closer look at the most important issues facing writing tutors and the students who confer with them. Like its predecessor, A Tutor's Guide, second edition, provides access to the professional conversation that surrounds writing-center practices, offering a concrete sense of what tutoring sessions are really like, who uses them, and how to maximize their effectiveness. Now, new chapters take the interactions outlined in the first edition into conferences with: English language learners business and technical writers advanced composition students graduate-level writers. The second edition also includes a new chapter that helps tutors understand what happens when a session goes awry and gives them

fresh tools for reflection that will strengthen their ability to respond to unusual situations in the future. With a keen awareness of both the nuts and bolts and the important theoretical and pedagogical underpinnings of good tutoring, A Tutor's Guide is an invaluable tool for every writing center.

Communication research is evolving and changing in a world of online journals, open-access, and new ways of obtaining data and conducting experiments via the Internet. Although there are generic encyclopedias describing basic social science research methodologies in general, until now there has been no comprehensive A-to-Z reference work exploring methods specific to communication and media studies. Our entries, authored by key figures in the field, focus on special considerations when applied specifically to communication research, accompanied by engaging examples from the literature of communication, journalism, and media studies. Entries cover every step of the research process, from the creative development of research topics and questions to literature reviews, selection of best methods (whether quantitative, qualitative, or mixed) for analyzing research results and publishing research findings, whether in traditional media or via new media outlets. In addition to expected entries covering the basics of theories and methods traditionally used in communication research, other entries discuss important trends influencing the future of that research, including contemporary practical issues students will face in communication professions, the influences of globalization on research, use of new recording technologies in fieldwork, and the challenges and opportunities related to studying online multi-media environments. Email, texting, cellphone video, and blogging are shown not only as topics of research but also as means of collecting and analyzing data. Still other entries delve into considerations of accountability, copyright, confidentiality, data ownership and security, privacy, and other aspects of conducting an ethical research program. Features: 652 signed entries are contained in an authoritative work spanning four volumes available in choice of electronic or print formats. Although organized A-to-Z, front matter includes a Reader's Guide grouping entries thematically to help students interested in a specific aspect of communication research to more easily locate directly related entries. Back matter includes a Chronology of the development of the field of communication research; a Resource Guide to classic books, journals, and associations; a Glossary introducing the terminology of the field; and a detailed Index. Entries conclude with References/Further Readings and Cross-References to related entries to guide students further in their research journeys. The Index, Reader's Guide themes, and Cross-References combine to provide robust search-and-browse in the e-version.

The bestselling workbook and grammar guide, revised and updated! Hailed as one of the best books around for teaching grammar, The Blue Book of Grammar and Punctuation includes easy-to-understand rules, abundant examples, dozens of reproducible quizzes, and pre- and post-tests to help teach grammar to middle and high schoolers, college students, ESL students, homeschoolers, and more.
