growing in this field. NBRC exam-style assessment questions test your comprehension of the material in each chapter. Neonatal and pediatric disorders case studies provide an opportunity to see how content covered in the text applies to the more difficult areas of care for neonatal and pediatric disorders.

Comprehensive test preparation is provided through coverage of all the content in the matrix for the NPS exam. Learning objectives at the beginning of each chapter highlight what you should learn by breaking down key content into measurable behaviors, criteria, and conditions. Academic and authoritative presentation of content covers all of the major topics of respiratory care for neonates, infants, and children, including both theory and application. Dedicated Quality and Safety chapter addresses quality care for the neonatal/pediatric patient. NEW! Revised chapter Invasive Mechanical Ventilation of the Neonate and Pediatric Patient, conforms to the new terminology and taxonomy for modes of ventilation. NEW! Additional case studies provides more application opportunities for you. NEW! Revised content better correlates to the NBRC NPS exam.

New 7th Edition! Powerful resource for interactive, simulation-based teaching and learning! The Neonatal Resuscitation Program (NRP) is an educational program jointly sponsored by the American Academy of Pediatrics (AAP) and the American Heart Association (AHA). Sudden cardiac arrest is the leading cause of death among adults, yet it need not be fatal. Though survival in most communities is very poor, a few communities achieve rates as high as 50%. Why are some communities so successful in snatching life from the jaws of death? Resuscitate! describes the steps any EMS system can take to improve cardiac arrest survival. It is written for the medical directors, administrative directors, fire chiefs, dispatch directors, and program supervisor who direct and run EMS systems all across the country, and for the EMTs, paramedics, and dispatchers who provide frontline care. This second edition of Resuscitate! provides fifteen concrete steps to improve survival. Four steps will lead to rapid improvements at the local level and are relatively easy to implement. Six additional steps are more difficult to implement but also likely to improve survival. The remaining steps recommend changes at the national level. Resuscitate! is the official textbook for the Resuscitation Academy, held twice a year in Seattle. Cosponsored by Seattle Medic One, King County EMS, and the Medic One Foundation, the Academy draws attendees from throughout the world for two intensive days of classes, demonstrations, and workshops to acquire the knowledge and tools to improve survival in their own communities. This new edition includes lessons learned from attendees of the Academy as well as from the faculty's evolving

thoughts on how to measure performance and improve survival, one community at a time. It also includes an addendum on the Resuscitation Academy (resuscitationacademy.org). For more than thirty years, Mickey S. Eisenberg M.D., Ph.D. , has played a leading role in developing King County, Washington's emergency response to cases of sudden cardiac arrest, a system recognized as among the very best in the nation. He is a professor of medicine at the University of Washington and serves as the medical director of King County Emergency Medical Services.

A classic text since it was first published in 1974, the Lippincott Manual for Nursing Practice (LMNP) has provided essential nursing knowledge and up-to-date information on patient care for nearly 40 years. Now in its 10th edition, this full-color text continues to serve as the most comprehensive reference for practicing nurses and nursing students worldwide. Often referred as the 'Lippincott Manual' or simply the 'Lippincott', the LMNP is widely used as a procedure manual for many healthcare institutions (contains 157 Nursing Procedure Guidelines). It is also widely regarded as the Gold Standard for nursing practice in the classroom. Organized into five major parts, LMNP presents a comprehensive reference for all types of core nursing care. Part 1: Nursing Process & Practice; Part 2: Medical-Surgical Nursing; Part 3: Maternity & Neonatal Nursing; Part 4: Pediatric Nursing; Part 5: Psychiatric Nursing. Content is evidence-based with supporting articles highlighted in actual entries and procedure guidelines. Official Guidelines that shape practice are incorporated in to the content and include those from the National Institutes of Health, American Diabetes

proactively and details the resources that must be on hand to effectively deal with these situations. Written by noted dentistry educator Dr. Stanley Malamed, this expert text includes the latest guidelines for drug-related emergencies, cardiac arrest, and more. An enhanced eBook is included with each new print purchase, featuring a complete, fully searchable version of the text, a test bank of 300 questions and answers, and much more — available on a variety of devices. Logical format reflects the way emergencies are encountered in a dental practice, with chapters organized by commonly seen clinical signs and symptoms, such as unconsciousness or altered consciousness, respiratory distress, seizures, allergic reactions, chest pain, and cardiac arrest. Step-by-step procedures include detailed, sequential instructions for stabilizing and treating patients (PCABD) in common medical emergencies. Full-color illustrations demonstrate emergency techniques with realistic clarity. Summary tables and boxes make it easy to find essential concepts and information. Quick-reference algorithms in the appendix include step-by-step diagrams showing the decision-making process in common emergency situations. A differential diagnosis chapter ends each of the book ' s parts on common emergencies. An enhanced eBook version is included with each new print purchase, featuring a fully searchable version of the text, an image collection, a test bank of 300 questions and answers, and more! UPDATED content includes the most current guidelines for drug-related emergencies, unconsciousness, altered consciousness, and cardiac arrest as well as protocols for obstructed airway management.
