40 or 50 families control the economies of Hong Kong, Singapore, Thailand, the Philippines and Indonesia. Their interests range from banking to property, from shipping to sugar, from vice to gambling. 13 of the 50 richest families in the world are in South East Asia yet they are largely unknown outside confined business circles. Often this is because they control the press and television as well as everything else. How do they do it? What are their secrets? And is it good news or bad for the places where they operate? Joe Studwell explosively lifts the lid on a world of staggering secrecy and shows that the little most people know is almost entirely wrong.

The book is an outstanding compilation. It is easy to use, the information is clear and well-presented, and the volume is smart and robustly crafted. . . The book is an important reference source for practitioners in international business, entrepreneurs and Asian studies. Bob Duckett, Reference Reviews The current compilation fills the need for a Who s Who in the Chinese business world. . . This is a useful reference for scholars and students in China studies and for business practitioners. Recommended. K.T. Wei, Choice As direct foreign investment, both inward and outward, continues to gather momentum, the need to understand the leaders of Chinese corporations is increasingly important. The Biographical Dictionary of New Chinese Entrepreneurs and Business Leaders is therefore a welcome addition to corporate and academic libraries. The encyclopedia provides up-to-date coverage of the major players in China s new economy. Dorothy Mays, Chinese Librarianship A long awaited reference volume! Professionally compiled and user-friendly. A must for the serious researcher. Leo-Paul Dana, Journal of Enterprising Communities Biographical information about business leaders and entrepreneurs in China is scattered in a variety of Chinese sources such as books, newspapers, journal articles, web pages, etc. and are difficult to locate, especially from outside of China. This biographical dictionary, written in English, which includes some 200 of the most important movers and shakers of the new Chinese economy since 1978, is a very useful reference tool for libraries of all types as well as for anyone who is interested in learning and understanding the growing influence of China as a new economic power in the world. Hwa-Wei Lee, formerly of the Library of Congress, and Ohio University Libraries This impressive effort by two leading scholars of Chinese business and society will quickly become a reference for all students and practitioners. Indeed, it is a ready vade mecum, filling the crying gap many experts have identified in recent years. This work will set the standard for its successors: independent in its analytical assessments, broad-spectrum in its choice of entry, far-sighted in its selections. John R. McIntyre, Georgia Institute of Technology, US The book is a must-have for any student, library, executive or entrepreneur contemplating the business environment in China. In an important society where clout is paramount and relationship is key, the book s listing of Who s Who in China is essential to success. An essential read for anyone thinking of doing business in China! J. Mark Munoz, Munoz and Associates International and author of A Salesman in Asia For anyone interested in interacting with China, whether doing business or not, it would be advantageous to know thy foe and thyself , as Sunzi (Sun Tzu) put it. And this work will definitely be conducive to your gaining an insight on contemporary China and its economic boom. It can be used as a reference tool or read as a textbook. Highly recommended for college and public libraries. Shixing Wen, Editor-in-Chief, Chinese Librarianship, Former President, Chinese American Librarians Association and Councilor, American Library Association This exhaustive resource provides comprehensive coverage of the major players in the Chinese economy since the reform era, which began in 1978. It includes 200 entries briefly summarizing each individual s life and career, with a central focus on his or her accomplishments and the key roles played in the economic development of China. The emphasis of the book is on the movers and shakers of China s new economy, highlighting notable

figures from both the initial economic liberalization period and the renewed growth from the early 1990s to the present time. This invaluable dictionary is the result of collaborative efforts across the globe. Over forty scholars from the United States, mainland China and Taiwan, United Kingdom, Germany, F

In June 1985, a symposium, "Changing Identities of the Southeast Asian Chinese since World War II" was held at the Australian National University in Canberra. This volume includes many of the papers from that symposium presented by ANU scholars and those from universities elsewhere in Australia, North America and Southeast Asia. Participants looked at the current thinking about the parameters of identity and shared their own research into the complex issues that overlapping categories of identity raise. Identity was chosen as the focus of the symposium because perceptions of self - whether by others or by the individual Chinese concerned - appear to lie at the heart ' of the present-day Chinese experience in Southeast Asia. It is also evident that identity wears many guises and that we cannot talk about a single Chinese identity when identity can be determined by the different political, social, economic or religious circumstances an individual faces at any given time. One of the distinctive characteristics of all the essays in this volume is that they are written from an historical perspective. While the papers focus on how recent developments in Southeast Asian society have shaped Chinese identity, they also discuss those changes in terms of the historical matrix from which they developed. Because many of the essays in this volume combine an historical overview with more recent statistical data, it should serve as a useful companion to the increasingly popular case studies in which much of the writing about the Chinese in Southeast Asia is now cast.

The study aims at finding an explanation to the economic development of Southeast Asia. To achieve this end, Indonesia, Malaysia, Thailand and the Philippines have been chosen as the foci of the study. To explain the region's recent success, the study is guided by the hypothesis that overseas Chinese entrepreneurship, exercised by a group belonging to a discriminated ethnic minority, is an indispensable component of the capitalist development of Southeast Asia. Overseas Chinese businesses dominate nearly all branches of the economy of their respective countries of residence. On a regional scale, they are acknowledged to control two-thirds of the region's retail trade. The hypothesis of the study is validated by the empirical findings. Furthermore, the study has arrived at the conclusion that Southeast Asia is host to a type of entrepreneurship - Overseas Chinese entrepreneurship - that evolved and developed throughout the centuries and proven for its resiliency and risk-taking abilities. It did not create the boom in the region, however. Liberal government policies, the inflow of huge foreign capital, and the availability of cheap and skilled labor among the indigenous population are among the more crucial factors that facilitated this transformation.

A New York Times bestselling author and veteran board member offers an insider's view of corporate boards, their struggles, and why they must adapt to survive. Corporate boards are under great pressure. Scandals and malpractice at companies like Theranos, WeWork, Uber, and Wells Fargo have raised justified questions among regulators, shareholders, and the public about the quality of corporate governance. In *How Boards Work*, prizewinning economist and veteran board director Dambisa Moyo offers an insider's view of corporate boards as they are buffeted by the turbulence of our times. Moyo argues that corporations need boards that are more transparent, more knowledgeable, more diverse, and more deeply involved in setting the strategic course of the companies they lead. *How Boards Work* offers a road map for how boards can steer companies through tomorrow's challenges and ensure they thrive to benefit their employees, shareholders, and society at large.

A 2006 text based on courses taught successfully over many years at Michigan, Imperial College and Pennsylvania State.

Environmental pollution poses serious challenges for China, including to its economy as well as public health. The *China Story Yearbook 2015: Pollution* looks at how China ' s Communist Party-state addresses these problems and how Chinese citizens have coped with and expressed their concerns about living with chronic, worsening pollution. This Yearbook also explores the broader ramifications of pollution in the People ' s Republic for culture, society law and social activism, as well as the Internet, language, thought, and approaches to history. It looks at how it affects economic and political developments, urban change, and China ' s regional and global posture. The Chinese Communist Party, led by ' Chairman of Everything ' Xi Jinping, meanwhile, has subjected mainland society to increasingly repressive control in its new determination to rid the country of Western ' spiritual pollutants ' while achieving cultural purification through ' propaganda and ideological work ' . To adulterate, contaminate, spoil or violate—these are among the metaphorical and literal connotations of pollution expressed in this Yearbook via the character 污, which forms part of the word for pollution in Chinese, 污染. As the world increasingly relies on economic ties with China, the complexities of China ' s one-party system and the Chinese government ' s attitudes towards ' pollution ' are of increasing global significance.

Companies can both serve society and create profit. This book shows how—based on rigorous evidence and an actionable framework.

Describes how expatriate Chinese entrepreneurs are building business empires in Southeast Asia
