MikroTik socks proxy, /ip socks set enabled=no. MikroTik UPNP service, /ip upnp set enabled=no. MikroTik dynamic name service or ip cloud, /ip cloud set ddns-enabled=no update-time=no More Secure SSH access. RouterOS utilises stronger crypto for SSH, most newer programs use it, to turn on SSH strong crypto: /ip ssh set strong-crypto=yes Router ...

Manual:Securing Your Router - Mikrotik Wiki
To overcome these limitations RouterOS includes a number of so-called NAT helpers, that enable NAT traversal for various protocols. Masquerade Firewall NAT action=masquerade is unique subversion of action=srcnat , it was designed for specific use in situations when public IP can randomly change, for example DHCP-server changes it, or PPPoE tunnel after disconnect gets different IP, in short ...

Manual:IPFirewallNAT - Mikrotik Wiki
To set this in RouterOS we will manually add IP address, add default route with provided gateway and set up DNS server /ip address add address=1.2.3.100/24 interface=ether1 /ip route add gateway=1.2.3.1 /ip dns set servers=8.8.8.8. PPPoE Connection. PPPoE connection also gives you dynamic IP address and can configure dynamically DNS and default gateway. Typically service provider (ISP) gives ...

First Time Configuration - RouterOS - MikroTik Documentation
Since the introduction of the recent FastTrack feature and the release of Router OS 6.29.1, there is a confusion among users about how they can implement the FastTrack rules in the Mikrotik Firewall. With the recent Router OS releases, the FastTrack feature begins working on various interfaces, such as VLANs.

Everything About Mikrotik Firewall Rules You Should Know
Most of the MikroTik devices are equipped with dedicated switching hardware, so-called switch chip or switch ASIC. This allows us to offload some of the bridging functions, like packet forwarding between bridge ports or packet filtering, to this specialized hardware chip without consuming any CPU resources. In RouterOS, we have named this function as Bridge Hardware (HW) Offloading. Different ...

Packet Flow in RouterOS - RouterOS - MikroTik Documentation
RouterOS allows to export and import parts of configuration in plain text format. This method can be used to copy bits of configuration between different devices, for example clone whole firewall from one router to another.
