As a general rule, SAP licensing is based on two components: packages and named users. The SAP Business Objects licensing model is quite straightforward. There's no longer a need to consider CPUs or cores. And if you only use SAP BusinessObjects as display-only BI, then named user licences are not necessary either.

Understanding the SAP Business Objects Licensing Model

Access BO Central Management Console and select \u201cUsers and Groups\u201d. You can do it in two different ways: Go to user, right click and select \u201cMember of\u201d. Then select the user group. Go to user groups, right click and select \u201cAdd member to Group\u201d I prefer using the second option because you can add many users to the user group at once.

Folder Level Authorization in SAP BO (end-to-end) | SAP Blogs

SAP offers a down to earth, the easy understandable licensing model for SAP Business Objects BO BI. No more CPU's \u2013 bye-bye cores! In general, if an individual uses SAP Business Objects BI (SAP BO BI) solutions in a display-only manner, a named user license is not required. In that case, only the package license is needed. OK.

Blog - Licensing SAP Business Objects - JNC Consultancy

Assign the newly created user to the newly created user group. Now this part is a bit trickier. I have the userID for the newly created user and the groupID for the newly created group, now I just need to combine those. The way I did this, was to first retrieve the object needed to add or remove users from a group

Use Microsoft PowerShell to manage your BI Platform | SAP ...

In BusinessObjects object model the \u201cUser\u201d objects has a property called \u201cSI\_NAMEDUSER\u201d. If this property's value is set to \u201cTRUE\u201d then the user is a named user. Try using a query like this in Query Builder: SELECT si\_name, si\_userfullname, si\_creation\_time, si\_lastlogontime FROM CI\_SystemObjects WHERE si\_nameduser = 1

You can either build a foundational understanding of Webi by beginning with the fundamentals; or you can jump straight into the advanced discussions that are new to the latest release.

Many large and medium-sized organizations have made strategic investments in the SAP NetWeaver technology platform as their primary application platform. In fact, SAP software is used to manage many core business processes and data. As a result, it is critical for all organizations to manage the life cycle of user access to the SAP applications while adhering to security and risk compliance requirements. In this IBM\u2122 Redbooks\u2122 publication, we discuss the integration points into SAP solutions that are supported by the IBM Security access and identity management product capabilities. IBM Security software offers a range of identity management (IdM) adapters and access management components for SAP solutions that are available with IBM Tivoli\u2122 Identity Manager, IBM Tivoli Directory Integrator, IBM Tivoli Directory Server, IBM Access Manager for e-business, IBM Tivoli Access Manager for Enterprise Single Sign-On, and IBM Tivoli Federated Identity Manager. This book is a valuable resource for security officers, consultants, administrators, and architects who want to understand and implement an identity management solution for an SAP environment.

This book develops new approaches for the rapid development and flexible adaption of business processes. It investigates how process modelers can be supported by semantic technologies and puts special emphasis on expressiveness and scalability.

SAP can help you capture better information and deliver it more quickly, allowing you to make better decisions and maximize the business value of everything you do. However, SAP implementations require massive effort, total buy-in, and significant change throughout the organization. In SAP Implementation Unleashed, 10 expert SAP project managers, functional consultants, and technologists guide you through the entire journey, helping you avoid pain and pitfalls and gain all the benefits of SAP. The authors introduce start-to-finish business, technical, and project management roadmaps for successful SAP implementation. Then, drawing on their immense experience, they walk you through the entire process of planning and deployment\u2013addressing make-or-break issues and hidden gaps that other guidebooks ignore. You'll discover how to employ processes, models, and toolsets that help you achieve implementation excellence while systematically reducing cost and business risk. Along the way, you'll find actionable advice and real-world insight into innovative project management, best-suited leadership, effective load testing, contemporary infrastructure implementation, and more. George W. Anderson is responsible for providing enterprise applications thought leadership for the EDS/HP office of the CTO. A long-time SAP consultant and PMI-certified project manager, George has authored several best-selling books and enjoys new challenges. Charles D. Nilson is a senior program manager for EDS/HP and has led many successful SAP implementation teams over the years. He is a PMI PMP and is SAP Partner Academy certified in MM and PP. Tim Rhodes is a senior SAP technical consultant for EDS/HP and a Basis/infrastructure veteran focused on implementing, migrating, and upgrading SAP Business Suite and NetWeaver solutions. Tim is also an SAP-certified technical consultant, OCP, MCSE, and HP Master ASE. Detailed Information on How To... Define the business vision driving your implementation, and use it to design your solution Use TCO techniques to fully understand SAP's financial impact in your organization Structure your SAP project management office, business teams, technical support organization, and overall project team Size, plan, and test your SAP infrastructure to deliver the best performance and availability at the best cost Integrate SAP into an SOA environment Install and configure SAP Business Suite and NetWeaver components Perform basic functional configuration, testing, and change management activities Enable a smooth transition by successfully performing the critical tasks that immediately precede SAP Go-Live Choose the right mix of tools and applications to test, manage, and monitor SAP Prepare your SAP Operations team for its post-implementation responsibilities

If you are a business analyst, BI developer, or an IT professional who wants to learn the A to Z of how to work with Web Intelligence reporting tools and different types of data, then this book is for you. The only thing you need is a basic understanding of what Business Intelligence is and data concepts.

If you are a developer with a good command and knowledge of creating dashboards, but are not yet an advanced user of SAP BusinessObjects Dashboards, then this is the perfect book for you. Prerequisites include a good working knowledge of Microsoft Excel as well as knowledge of basic dashboard practices.
