## Securing Web Services With WS

WS Security is a standard that addresses security when data is exchanged as part of a Web service. This is a key feature in SOAP

# Access PDF Securing Web Services With Ws Security

that makes it very popular for creating web services. Security is an important feature in any web application.

# Access PDF Securing Web Services With WS Security

Securing SOAP-Based Web Services with WS-Security SOAP-based security provides end-to-end message-level security for Web services through an implementation of the WS-Security standard. WS-Security defines a mechanism that offers three levels of security to SOAP messages:

# Access PDF Securing Web Services With WS Security

Authentication tokens (username token).

## **Securing Web Services and OAM MBeans - Oracle**

The Oasis organization has defined a standard (part of well-known WS-\*) which aims at providing high level

Access PDF Securing Web Services With WS Security

features in the context of web services: WS-Security. It provides a standard way to secure your services above and beyond transport level protocols such as HTTPS. WS-Security relies on other standards like XML-Encryption.
