Ship Engine Room Equipment

Given below is a list of tanks that you would normally find on the bottom platform of a ship. Fuel oil drain tank. Sludge drain tank. Lube oil drain tank. Lube oil renovating tank. Scavenger drain tank. Stuffing oil drain tank. Piston cooling water tank. Bilge holding tank.

Ships Engine Rooms - Ships Main Engines & Central ...

Equipment Engines. The engine room of a motor vessel typically contains several engines for different purposes. Main, or propulsion engines are used to turn the ship's propeller and move the ship through the water. They typically burn diesel oil or heavy fuel oil, and may be able to switch between the two. There are many propulsion arrangements for motor vessels, some including multiple engines, propellers, and gearboxes.

Engine room - Wikipedia

There is no hard and fast rules regarding the location of each item of equipment, but normally the engine room consists of several levels having different machinery such as auxiliary engines or diesel generators, a boiler, the inert gas plant, fresh water generator, and purifiers, fuel and oil pumps and storage tanks, the engine control room, waste incinerator, and several other common paraphernalia like electrical panels at various levels.
