Status, Power, and Legitimacy presents methodological, theoretical, and empirical essays by Joseph Berger and

# Download Free Strategies For

Morris Zelditch, Jr.—two of the leading contributors to the Stanford tradition in the study of microprocesses. This three-part volume brings together major contributions to the development of this tradition, in addition to a number of newly written essays published here for the first time. Berger and Zelditch integrate

# Download Free Strategies For

the essays and relate them to a larger body of theory and research as they explore the importance of a generalizing orientation in sociology. Their view of theory as flux and process, the blending of social process with theory-building, produces a picture of the social world in line with the great tradition of

# Download Free Strategies For

George Herbert Mead,  
Max Weber, and Georg  
Simmel. Status, Power,  
and Legitimacy explores  
the relation between the  
scope of a theory and  
testing, applying, and  
developing it; the  
relation between  
abstract, general  
theories and empirical  
generalizations; and  
how to use an  
understanding of this

relation to construct theories that are neither historically nor culturally bound. In the first part, Berger and Zelditch discuss strategies of theory construction, the development of abstract, general theories of social processes, and the different ways in which theories grow. Status processes are the focus

of the second part,  
which includes: the  
formation of reward  
expectations; the role of  
status cues in  
interaction; the  
evolution of status  
expectations; and the  
application of status  
characteristics theory to  
male-female interaction.  
Lastly, the authors  
dissect power and  
legitimacy: the effect of

expectations on power;  
the legitimation of  
power and its effect on  
the stability of authority;  
and legitimation under  
conditions of dissensus.

This volume is a fine  
theoretical effort of  
great depth and breadth.

Berger and Zelditch  
review the background  
of each paper, place the  
new concepts and  
principles introduced by

each paper in context and examine subsequent research generated by the paper. They carve out new research areas in the social world of class, status, power, and authority. This volume will be of interest to those in the fields of sociology and, in particular, social theory.
