cells), and nervous tissue. Organs represent various combinations of these four basic tissue types, which thus comprise the entire body.

Connective Tissue Study Guide
Connective tissue consists of scattered cells immersed in an

Access Free Study Guide For Connective Tissue

intercellular material called the matrix. The matrix consists of fibers and ground substance. The kinds and amounts of fiber and ground substance determine the character of the matrix, which in turn defines the kind of connective tissue.

Access Free Study Guide For Connective Tissue

Connective Tissue

Connective tissue is composed primarily of two elements: cells and a matrix. The types of cells found in connective tissue vary depending on the type of tissue they support. For example, red and...

Blood is also covered in this section.
This is because blood vessels are
found in the connective tissue, and
some white blood cells leave the

Access Free Study Guide For Connective Tissue

blood vessels and make up part of the connective tissues.

Tissue types: The Histology Guide

Loose connective tissue consists of thin, loosely arranged collagen fibers in a viscous ground substance. Dense connective tissue can be further

Access Free Study Guide For Connective Tissue

classified into dense regular connective tissue and dense irregular connective tissue. Dense regular connective tissue makes up tendons and ligaments. Fibers are densely packed and organized in parallel to create a strong tissue capable of withstanding the pull of muscle and
