~~Structural vs. Cyclical Unemployment~~

The root cause of structural unemployment is the skills mismatch. The economy as a whole is functional. This means that there are still more jobs in the economy than there are people to do the jobs. However, in some areas of the economy, there is abundant labor and no jobs whereas in other areas there are plenty of jobs and fewer laborers.

~~Structural Unemployment—Definition, Causes and Cure~~

The first cause of structural unemployment is technological development, which often makes jobs obsolete, thereby increasing rates of unemployment. It also means that companies have to hire fewer employees across the board; they achieve higher levels of productivity at lower costs when they fire human workers in favor of applying new technologies.

~~Structural Unemployment | Intelligent Economist~~

The graph also shows higher structural unemployment in the Eurozone. Even during times of growth, the average unemployment rate is higher. This structural unemployment has been attributed to factors, such as labour market immobilities and excessive labour market regulation.
