Approximately 4 million U.S. service members took part in the wars in Afghanistan and Iraq. Shortly after troops started returning from their deployments, some active-duty service members and veterans began experiencing mental health problems. Given the stressors associated with war, it is not surprising that some service members developed such mental health conditions as posttraumatic stress disorder,

depression, and substance use disorder. Subsequent epidemiologic studies conducted on military and veteran populations that served in the operations in Afghanistan and Iraq provided scientific evidence that those who fought were in fact being diagnosed with mental illnesses and experiencing mental health-related outcomes in particular, suicide at a higher rate than the general population. This report provides a comprehensive assessment of the quality, capacity, and access to mental health care services for veterans who served in the Armed Forces in Operation Enduring Freedom/Operation Iraqi Freedom/Operation New Dawn. It includes an analysis of not only the quality and capacity of mental health care services within the Department of Veterans Affairs, but also barriers

In boyhood, Louis Zamperini was an incorrigible delinquent. As a teenager, he channeled his defiance into running, discovering a prodigious talent that had carried him to the Berlin Olympics. But when World War II began, the athlete became an airman, embarking on a journey that led to a doomed flight on a May afternoon in 1943. When his Army Air Forces bomber crashed into the Pacific Ocean, against all odds, Zamperini survived, adrift on a foundering life raft. Ahead of Zamperini lay thousands of miles of open ocean, leaping sharks, thirst and starvation, enemy aircraft, and,

His fate, whether triumph or tragedy, would be suspended on the fraying wire of his will. her way back to him in this deeply moving illustrated novel from the author of Wild Wings. Scarlet doesn't have an easy life. She's never known her dad, her mom suffers from depression, and her younger brother Red has Asperger's and relies heavily on her to make the world a safe place for him. Scarlet does this by indulging Red's passion for birds, telling him stories about the day they'll go to Trinidad and see all the wonderful birds there (especially his beloved Scarlet Ibis), saving her money to take him to the zoo, helping him collect bird feathers, and even caring for a baby pigeon who is nesting outside his window. But things with her mom are getting harder, and after a dangerous accident, Scarlet and Red are taken into foster care and separated. As Scarlet struggles to cope with the sudden changes in her life and her
