The Mikoyan MiG-17 was built by Mikoyan-Gurevich as a high-subsonic fighter aircraft in the Soviet Union. It was introduced in October 1952 and it has been in service with different air forces around the world. It came after the MiG-15 used during the Korean War.

Mikoyan Gurevich MiG-17 – Price, Specs, Photo Gallery ...

The MiG-17 was an improved and significantly upgraded derivative of the original post-war MiG-15. Equipped with an afterburning turbojet engine of considerably greater thrust than its predecessor, the MiG-17 was the first Russian aircraft capable of near-sonic velocities in level flight. It could, in fact, fly supersonically in a shallow dive.

Mikoyan Gurevich MiG-17 | The Museum of Flight

Three North Vietnamese pilots attained ace status flying the MiG-17, led by Nguyen Van Bay with seven victories. Mikoyan-Gurevich began work on the MiG-17 just as the MiG-15 was entering quantity production. The latter type would prove itself in the Korean War, but it suffered from some instability in the high-speed regime.
