This revised paperback edition features a new prologue and updated citations. The book extends the theoretical approach of Black's classic BEHAVIOR OF LAW (Academic Press, 1976) to a dramatically larger universe: the handling of conflict across societies and history. It also introduces and illustrates Black's "pure sociology," a new theoretical paradigm applicable to human behavior of every kind. Key Features* Provides current

For too long the study of law and society in the modern Middle East has been left to specialists in narrow subcategories of law or the social sciences. *Property, Social Structure, and Law in the Modern Middle East* lays the groundwork for a new field of scholarship in which analysis of the social dimensions of law and the legal dimensions of social structure are integrated. It offers the stimulus of a variety of new models of scholarship by a distinguished international group of contributors whose work shares a common focus on regimes of property in the societies of the modern Middle East. The case

studies examine the regulations of many kinds of property in relation to the social structures of selected Middle Eastern communities from the eighteenth century to the present. Most of the societies studied are subjected to pressures for rapid modernization and adjustment to major economic transformations. The book features comparisons of property rights and relations under regimes of Islamic and customary law as well as modern statutory law. Highlighted are new patterns of intervention by modern Middle Eastern states to alter traditional regimes of property and to transform the accompanying

and shows how structural tendencies associated with smaller structures shape and constrain patterns of larger structures. The book then investigates the role such structures have played in the emergence of the modern nation-state. Bringing together the latest findings in sociology, anthropology, political science, and history, John Levi Martin traces how sets of interpersonal relationships become ordered in different ways to form structures. He looks at a range of social structures, from smaller ones like families and street gangs to larger ones such as communes and, ultimately, nation-

states. He finds that the relationships best suited to forming larger structures are those that thrive in conditions of inequality; that are incomplete and as sparse as possible, and thereby avoid the problem of completion in which interacting members are required to establish too many relationships; and that abhor transitivity rather than assuming it. Social Structures argues that these "patronage" relationships, which often serve as means of loose coordination in the absence of strong states, are nevertheless the scaffolding of the social structures most distinctive to the modern state, namely the

Lifestyle and Social Structure: Concepts, Definitions, Analyses is devoted the relationship between lifestyle and social structure. The book begins by constructing a meaningful concept of lifestyle in order to understand and model this relationship. The general formulation of the concept hinges on the descriptive word style, defined as "any

distinctive, and therefore recognizable way in which an act is performed or an artifact made or ought to be performed and made."

After developing the implications of the definition, lifestyle is defined, by analogy, as "any distinctive, and therefore recognizable mode of living." The notion of social structure is then introduced, arguing that structural differentiation engenders lifestyle differentiation. The remainder of the work is concerned primarily with the modeling of this relationship using data from the 1972-1973 Survey of Consumer Expenditures, and with the concept of

stylistic unity. Key topics discussed include the relationship between the theory of lifestyle differentiation and modern economic utility theory; psychographic notions of lifestyle; and the relationships between lifestyle and other key sociological concepts (stratification, alienation). The concept of lifestyle should be of interest to a broad range of applied and theoretical researchers.
