Argues that the symptoms of many illnesses are actually the result of the mercury in the amalgams used to fill teeth

Dr. Huggins and Dr. Levy assert that a large number of disorders are, though often incurable, easily preventable. He proposes that multiple sclerosis, lupus, leukemia, chronic fatigue syndrome, Parkinson's disease, many mental disorders including Alzheimer's, and even major diseases like breast cancer are caused, in part, by the toxins we place in our bodies. Where do these toxins come from and how do they get into our bodies? You may be surprised to find that you have actually paid to have them put there. These dangerous materials--mercury, cadmium, beryllium, nickel, and others--are used in everyday dentistry to make up the fillings, root canals, and bridgework in our mouths, and are supposed to be "safe." But are they? Uninformed Consent presents cases of toxic poisoning--of depressed immune systems and inexplicable illnesses--to toxins entering the bloodstream from the heavy metals in dental materials. The authors also discuss the hidden truths that the dental industry in America doesn't want to talk about, and the real reasons the dangers of these materials have been suppressed and ignored. Dr.'s Huggins and Levy implore the reader: "Don't leave your health in your dentist's hands and assume that all will be fine. Become informed and take an active role in your health. Know what will be implanted in your mouth. You must decide at the outset what is more important to you--the life of a filling or your life." Uninformed Consent will give you the facts so that you may take responsibility for your dental--and complete--health and wellness.

Mercury is one of the world's most poisonous substances, and yet dentists routinely use it in amalgams to fill our teeth. Forty years ago, Dr. Hal Huggins questioned this practice, and now legions of dentists, researchers, and citizens are adding their voices of concern. It's All in Your Head looks at past research on mercury toxicity and dental amalgams as well as current scientific findings that can no longer be ignored. It describes the possible effects of mercury toxicity, including multiple sclerosis, Alzheimer's disease, Hodgkin's disease, Chronic Fatigue Syndrome, and virtually all autoimmune disorders. Written in easy-to-understand language, It's All in Your Head explodes the claim that mercury amalgams are safe. If you think your worries are all in your head, you may be right.

Covering specific mouth and dental conditions such as ulcers, halitosis and tooth grinding, this book recognises the link between these conditions and systemic diseases. It provides a review some aspects of the basic anatomy and physiology of the mouth and teeth, such as biofilms, quorum sensing and cavitations, alongside information from current research. The book also includes discussion of the impact of natural ageing processes, satiety and taste perception as these associate with oral (and systemic) health. Discussing associations to systemic diseases such as cardiovascular disease, diabetes and adverse pregnancy outcomes, the book offers scientifically evidenced protocol possibilities and a balanced viewpoint. With practical guidance and theory, Oral Health and Systemic Disease is the go-to resource for nutritional therapists and functional medicine practitioners who want to deepen their knowledge of mouth and dental health issues.
