Value stream management (VSM) refers to the process of optimizing processes from the very point when you conceptualize an idea to the time when this idea is in production and generating revenue. To put it simply, VSM allows you to manage your SEO software development process from idea to cash.

*Defining value stream*

# Download Free Value Stream Management For The Lean Office Eight Steps owners

Value-stream mapping, also known as "material- and information-flow mapping", is a lean-management method for analyzing the current state and designing a future state for the series of events that take a product or service from the beginning of the specific process until it reaches the customer. A value stream map is a visual tool that displays all critical steps in a specific process and quantifies easily the time and volume taken at each stage. Value stream maps show the flow of both materials
