Erwin Schrödinger - A brief history of the father of quantum mechanics ~~What Is Life Erwin Schrodinger~~

What Is Life? The Physical Aspect of the Living Cell is a 1944 science book written for the lay reader by physicist Erwin Schrödinger. The book was based on a course of public lectures delivered by Schrödinger in February 1943, under the auspices of the Dublin Institute for Advanced Studies where he was Director of Theoretical Physics, at Trinity College, Dublin. The lectures attracted an audience of about 400, who were warned "that the subject-matter was a difficult one and that the ...

1887 – 4 January 1961), sometimes written as Erwin Schrodinger or Erwin Schroedinger, was a Nobel Prize-winning Austrian-Irish physicist who developed a number of fundamental results in quantum theory: the Schrödinger equation provides a way to calculate the wave function of a system and how it changes dynamically in time. In addition, he was the author of many works on ...

~~Erwin Schrödinger — Discovery, Quotes & Experiment — Biography~~

In a series of lectures at the Institute, Schrödinger addressed the phenomenon of life from the point of view of physics, and from first principles explained how genetic information might be stored in a molecule, and how life in many ways appeared to defy the second law of thermodynamics - unlike everything else in the universe life somehow becomes more ordered rather than the other way round.
