Why humans have cultures: explaining anthropology and ...

Culture is a powerful human tool for survival, but it is a fragile phenomenon. It is constantly changing and easily lost because it exists only in our minds. Our written languages, governments, buildings, and other man-made things are merely the products of culture. They are not culture in themselves.

Human Culture: What is Culture?

Culture relates to nature (our biology and genetics) and nurture (our environment and surroundings that also shape our identities). Learning Objectives. Examine the ways culture and biology interact to form societies, norms, rituals and other representations of culture. Key Takeaways.
