Secure Relationship Stan Tatkin—author of *Wired for Love*—offers powerful tips based in neuroscience and attachment theory to help you find a compatible mate and go on to create a fabulous relationship. Using real-life scenarios, you'll learn key concepts about how people become attracted to potential partners, move toward or away from commitment, and the important role the brain and nervous system play in this process. Each chapter explores the scientific concepts of attachment theory, arousal regulation, and neuroscience. And with a little practice, you'll learn to apply these exercises and practical techniques to your dating life. If you're ready to get serious (or not!) about dating, meet your match, and have more fun, this book will be your guide.

"If you and your prospective partner adopt the principles and skills I describe here, your relationship will be successful—not just for starters, but for the long run." An indispensable guide for any couple ready to set the foundation for a loving and lasting union. Committing fully to a loving partnership—a "we"—can be one of the most beautiful and fulfilling experiences you'll ever have. Yet as anyone in a long-term relationship will tell you, it can also be one of the most challenging. Almost half of all first marriages end in divorce, and chances go down from there. So how do you beat the odds? "All successful long-term relationships are secure relationships," writes psychotherapist Stan Tatkin. "You and your partner take care of each other in a way that ensures you both feel safe, protected, accepted, and secure at all times." In *We Do*, Tatkin provides a groundbreaking guide for couples. You'll figure out whether you and your partner are right for each other in the long term, and if so, give your relationship a strong foundation so you can enjoy a secure and lasting love. Highlights include: Create a shared vision for your relationship, the key to a strong foundation. It's all about prevention—learn tools and techniques for preventing problems before they occur. Understand how to work with the psychological and biological influences in your relationship—neuroscience, arousal regulation, attachment theory, and more. Numerous case studies with helpful examples of healthy and unhealthy interactions, sample dialogues, and reflections. Dozens of exercises—the newlywed game, reading facial expressions, and many more fun and serious practices to develop intimacy and security. Handling conflict—how to broker win-win outcomes. Build a loving relationship that helps you thrive and grow as both individuals and a couple. Common interests, physical attraction, shared values, and good communication skills are the factors most commonly thought to indicate a good partnership. Yet surprisingly, current research reveals that these are only a small part of what makes for a healthy marriage—much more important are psychological and biological influences. With *We Do*, you'll learn to navigate these elements and more, giving your relationship the best possible chance to succeed.

tell us what to eat, when to exercise, and how long to sleep. Why not use science to help us improve our relationships? In this revolutionary book, psychiatrist and neuroscientist Dr. Amir Levine and Rachel Heller scientifically explain why some people seem to navigate relationships effortlessly, while others struggle. Discover how an understanding of adult attachment—the most advanced relationship science in existence today—can help us find and sustain love. Pioneered by psychologist John Bowlby in the 1950s, the field of attachment posits that each of us behaves in relationships in one of three distinct ways:

- Anxious people are often preoccupied with their relationships and tend to worry about their partner's ability to love them back
- Avoidant people equate intimacy with a loss of independence and constantly try to minimize closeness.
- Secure people feel comfortable with intimacy and are usually warm and loving.

Attached guides readers in determining what attachment style they and their mate (or potential mate) follow, offering a road map for building stronger, more fulfilling connections with the people they love.

On the way to finding and creating vibrant, successful relationships, too many of us end up tangled in the same old patterns, tripped up by relationship habits that get in our way whether we "know better" or not. In *Rewire Your Brain for Love*, neuropsychologist and psychotherapist Marsha Lucas, PhD, helps you untangle those relationship snarls, bringing together the latest neuroscience with a practice consistently heralded by top academic institutions for its effectiveness in changing the brain: the practice of mindfulness meditation. Dr. Lucas's clear, unintimidating, often laugh-out-loud style invites you to explore how the brain functions in relationships, helping you understand how your current relationship wiring developed and showing you how you can rewire your relationship brain through mindfulness meditation. A down-to-earth therapist and self-described neuroscience geek, Dr. Lucas has written a chapter-by-chapter guide with compassion, wisdom, and humor. In *Rewire Your Brain for Love*, she takes you on a journey through seven high-voltage relationship benefits—everything from keeping your fear from running the show to cultivating healthy, balanced empathy—and offers specific mindfulness practices to help bring those benefits into your life. With a few minutes of practice a day, you can change the way you interact with everyone around you . . . especially those closest to you. You can transform your brain from an enemy to an ally in all matters of the heart, creating more loving communication, building emotional resilience, and reducing overreactivity—not to mention enjoying better sex. You don't have to become a monk, or a vegetarian, or spend hours contemplating your navel—you just need to update the relationship wiring of your brain. The simple practice of mindfulness can help get you there, with Dr. Lucas showing you how.

From the world's foremost neuroscientist of romantic love comes a personal story of connection and heartbreak that brings new understanding to an old truth: better to have loved and lost than never to have loved at all. At thirty-seven, Dr. Stephanie Cacioppo was content to be single. She was fulfilled by her work on the neuroscience of romantic love; how finding and growing with a partner literally reshapes our brains. That was, until she met the foremost neuroscientist of loneliness. A whirlwind romance led to marriage, to sharing an office at the University of Chicago. After seven years of being inseparable at work and home, she lost her beloved husband following a devastating battle with cancer. In *Wired for Love*, Dr. Stephanie Cacioppo tells not just a science story, but also a love story. She shares revelatory insights into how we fall in love, and why; what makes love last; and how we process love lost—all grounded in cutting-edge findings in brain chemistry and behavioural science. Woven through it all is her moving personal story, from astonishment, to unbreakable bond, to grief and healing. Her experience and her work enrich each other, creating a singular blend of science and lyricism that's essential reading for anyone looking for connection.

Has your romantic partner called you clingy, insecure, desperate, or jealous? No one wants to admit that they possess these qualities; but if you find yourself constantly on the alert, anxious, or worried when it comes to your significant other, you may suffer from anxious attachment, a fear of abandonment that is often rooted in early childhood experiences. In *Insecure in Love*, you'll learn how to overcome attachment anxiety using compassionate self-awareness, a technique that can help you recognize your negative thoughts or unhealthy behavior patterns and respond to them in a nurturing way—rather than beating yourself up. You'll also learn how insecurity can negatively affect healthy dialog between you and your partner (or potential partners) and develop the skills needed to stop you from reverting back to old patterns of neediness and possessiveness. If you suffer from anxious attachment, you probably know that you need to change, and yet you have remained stuck. With compassionate self-awareness, you can successfully explore old anxiety-perpetuating perceptions and habits without being overwhelmed or paralyzed by them. By understanding the psychological factors at the root of your attachment anxiety, you will learn to cultivate secure, healthy relationships to last a lifetime. If you're ready to stop getting stuck in the same hurtful relationship patterns and finally break the
